

CHSLD Manoir de l'Ouest de L'Ile

Accredited

April 2019 to 2023

CHSLD Manoir de l'Ouest de L'Ile has met the requirements of the Qmentum accreditation program and has shown a commitment to quality improvement. It is accredited until April 2023 provided program requirements continue to be met.

CHSLD Manoir de l'Ouest de L'Ile is participating in the Accreditation Canada Qmentum accreditation program. Qmentum helps organizations strengthen their quality improvement efforts by identifying what they are doing well and where improvements are needed.

Organizations that become accredited with Accreditation Canada do so as a mark of pride and as a way to create a strong and sustainable culture of quality and safety.

Accreditation Canada commends **CHSLD Manoir de l'Ouest de L'Ile** for its ongoing work to integrate accreditation into its operations to improve the quality and safety of its programs and services.

Accreditation Canada

We are independent, not-for-profit, and 100 percent Canadian. For more than 55 years, we have set national standards and shared leading practices from around the globe so we can continue to raise the bar for health quality.

As the leader in Canadian health care accreditation, we accredit more than 1,100 health care and social services organizations in Canada and around the world.

Accreditation Canada is accredited by the International Society for Quality in Health Care (ISQua) www.isqua.org, a tangible demonstration that our programs meet international standards.

Find out more about what we do at www.accreditation.ca.

Demonstrating a commitment to quality and safety

Accreditation is an ongoing process of evaluating and recognizing a program or service as meeting established standards. It is a powerful tool for quality improvement. As a roadmap to quality, Accreditation Canada's Qmentum accreditation program provides evidence-informed standards, tools, resources, and guidance to health care and social services organizations on their journey to excellence.

As part of the program, most organizations conduct an extensive self-assessment to determine the extent to which they are meeting the Accreditation Canada standards and make changes to areas that need improvement. Every four years, Accreditation Canada surveyors, who are health care professionals from accredited organizations, visit the organization and conduct an on-site survey. After the survey, an accreditation decision is issued and the ongoing cycle of assessment and improvement continues.

This Executive Summary highlights some of the key achievements, strengths, and opportunities for improvement that were identified during the on-site survey at the organization. Detailed results are found in the organization's Accreditation Report.

On-site survey dates

April 7, 2019 to April 10, 2019

Locations surveyed

- **1 location** was assessed by the surveyor team during the on-site survey. Locations and sites visited were identified by considering risk factors such as the complexity of the organization, the scope of services at various sites, high or low volume sites, patient flow, geographical location, issues or concerns that may have arisen during the accreditation cycle, and results from previous on-site surveys. As a rule, sites that were not surveyed during one accreditation cycle become priorities for survey in the next.
- All sites and services are deemed **Accredited** as of the date of this report.

See **Appendix A** for a list of the locations that were surveyed.

Standards used in the assessment

- **4 sets of standards** were used in the assessment.

Summary of surveyor team observations

These surveyor observations appear in both the Executive Summary and the Accreditation Report.

During the on-site survey, the surveyor team undertook a number of activities to determine the extent to which the organization met the accreditation program requirements. They observed the care that was provided; talked to staff, clients, families and others; reviewed documents and files; and recorded the results.

This process, known as a tracer, helped the surveyors follow a client's path through the organization. It gives them a clear picture of how service is delivered at any given point in the process.

The following is a summary of the surveyor team's overall observations.

West Island Manor is to be commended on participating in the Accreditation process. The organization is family run and the sense of family is pervasive. The leadership has been in place for many years and is committed to quality improvement and a home-like environment.

Leadership seeks out and welcomes opportunities for improvement through training and reviews from organizations like the Centre d'expertise en santé de Sherbrooke (CESS), the Ministerial Milieu de Vie, and Accreditation Canada. The commitment continues as leadership follows up on recommendations that are made. West Island Manor is proud of winning tenders for transition beds, demonstrating the Ministère de la Santé et des Services sociaux (MSSS) trust in and recognition of the organization.

Numerous community partnerships include the Centre Intégré de l'Ouest de L'Île and the Centre Intégré de Montérégie Ouest, from which residents are transferred into transition beds. Important partnerships with Beaconsfield Manor and Chateau Pierrefonds help stabilize services for all three organizations. The partnership with Proxim Pharmacy facilitates medication administration through blister packs while decreasing the risk of medication errors.

The staff are fantastic, with smiles and a friendly manner and willingness to help. Staff indicate that they feel safe, they have what is required to do their work, and they like working at the organization, and the low turnover attests to this. Recruitment of French-speaking staff is a challenge.

Care delivery is challenging due to the increase in residents with aggressive and challenging behaviours. Staff have attended a number of education sessions on managing challenging behaviours. The risk of resident-on-resident mistreatment is a challenge for staff and they require ongoing support to manage this risk.

Resident satisfaction surveys show that residents appreciate the services provided. Although there are User Committee meetings, there are no permanent members of the committee. The organization is encouraged to address this.

The organization is commended for its commitment to quality improvement. Much work has occurred throughout this past accreditation cycle. It will be essential to use the quality plans and accreditation survey results to continue the momentum. Accreditation is a process of inclusion in which staff, residents, and families all have a role to play.

Overview: Quality dimensions results

Accreditation Canada uses eight dimensions that all play a part in providing safe, high quality health care.

These dimensions are the basis for the standards, and each criteria in the standards is tied to one of the quality dimensions.

The quality dimensions are:

	Accessibility:	Give me timely and equitable services
	Appropriateness:	Do the right thing to achieve the best results
	Client-centred Services:	Partner with me and my family in our care
	Continuity:	Coordinate my care across the continuum
	Efficiency:	Make the best use of resources
	Population Focus:	Work with my community to anticipate and meet our needs
	Safety:	Keep me safe
	Worklife:	Take care of those who take care of me

Taken together, the dimensions create a picture of what a high quality health care program or service “looks like.” It is easy to access, focused on the client or patient, safe, efficient, effective, coordinated, reflective of community needs, and supportive of wellness and worklife balance.

This chart shows the percentage of criteria that the organization met for each quality dimension.

Quality Dimensions: Percentage of criteria met

Overview: Standards results

All of the standards make a difference to health care quality and safety. A set of standards includes criteria and guidelines that show what is necessary to provide high quality care and service.

Some criteria—specifically those related to safety, ethics, risk management, or quality improvement—are considered high priority and carry more weight in determining the accreditation decision.

This chart shows the percentage of high priority criteria and the percentage of all criteria that the organization met in each set of standards.

Standards: Percentage of criteria met

■ High priority criteria met
 ■ Total criteria met

Overview: Required Organizational Practices results

Accreditation Canada defines a Required Organizational Practice (ROP) as an essential practice that must be in place for client safety and to minimize risk. ROPs are part of the standards. Each one has detailed tests for compliance that the organization must meet if it is to meet the ROP.

ROPs are always high priority and it is difficult to achieve accreditation without meeting most of the applicable ROPs. To highlight the importance of the ROPs and their role in promoting quality and safety, Accreditation Canada produces the Canadian Health Accreditation Report each year. It analyzes how select ROPs are being met across the country.

ROPs are categorized into six safety areas, each with its own goal:

- **Safety culture:** Create a culture of safety within the organization
- **Communication:** Improve the effectiveness and coordination of communication among care and service providers and with the recipients of care and service across the continuum
- **Medication use:** Ensure the safe use of high-risk medications
- **Worklife/workforce:** Create a worklife and physical environment that supports the safe delivery of care and service
- **Infection control:** Reduce the risk of health care-associated infections and their impact across the continuum of care/service
- **Risk assessment:** Identify safety risks inherent in the client population

See **Appendix B** for a list of the ROPs in each goal area.

ROP Goal Areas: Percentage of tests for compliance met

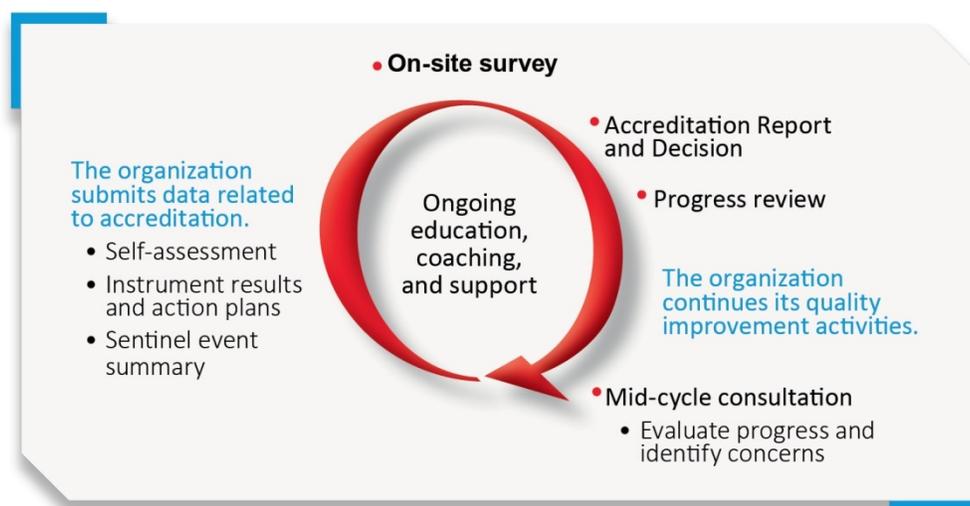

The quality improvement journey

The Qmentum accreditation program is a four-year cycle of assessment and improvement, where organizations work to meet the standards and raise the quality of their services. Qmentum helps them assess all aspects of their operations, from board and leadership, to care and services, to infrastructure.

The program identifies and rewards quality and innovation. The time and resources an organization invests in accreditation pay off in terms of better care, safer clients, and stronger teamwork. Accreditation also helps organizations be more efficient and gives them structured methods to report on their activities and what they are doing to improve quality.

In the end, all Canadians benefit from safer and higher quality health services as a result of the commitment that so many organizations across the country have made to the accreditation process.

Qmentum: A four-year cycle of quality improvement

As **CHSLD Manoir de l'Ouest de L'Île** continues its quality improvement journey, it will conduct an in-depth review of the accreditation results and findings. Then a new cycle of improvement will begin as it incorporates any outstanding issues into its overall quality improvement plan, further strengthening its efforts to build a robust and widespread culture of quality and safety within its walls.

Appendix A: Locations surveyed

1 CHSLD Manoir de l'Ouest de L'Ile

Appendix B

Required Organizational Practices

Safety Culture

- Patient safety incident disclosure
 - Patient safety incident management
 - Patient safety quarterly reports
-

Communication

- Client Identification
 - Information transfer at care transitions
 - Medication reconciliation as a strategic priority
 - Medication reconciliation at care transitions
 - The “Do Not Use” list of abbreviations
-

Medication Use

- High-Alert Medications
 - Infusion Pumps Training
-

Worklife/Workforce

- Patient safety plan
 - Patient safety: education and training
 - Preventive Maintenance Program
 - Workplace Violence Prevention
-

Infection Control

- Hand-Hygiene Compliance
 - Hand-Hygiene Education and Training
 - Infection Rates
 - Reprocessing
-

Risk Assessment

- Falls Prevention Strategy
 - Pressure Ulcer Prevention
 - Suicide Prevention
-
